CLASS : IV B.TECH BATCH:2017-2021

DATE:15-07-2021

Name of the Program: B.TECH PROJECTS BATCHES LIST

S.NO	Roll No	Name of the Student	TITLE	Guide Name
1	17JU1A0121	V.L.V. MANIKANTESWARA RAO	Analysis And Design Of Multistory (G+4) Building with Estimation And Costing	Mr.SMD.Areefuddin
2	17JU1A0126	P. NAGA ARUN KRISHNA BABU		
3	17JU1A0128	D. NAGOOR VALI		
4	17JU1A0134	S. RAMESH		
5	17JU1A0114	R. HARITHA BAI		
6	17JU1A0106	J. CHARISHMA	Design And analysis Of Multistoried Building Using Staad.Pro	Mr.K.Ramudu
7	17JU1A0118	G.KAVYA SREE		
8	17JU1A0124	M. MALLIKARJUNA GOWD		
9	18JU5A0108	D. RANGA SUDHA		
10	18JU5A0110	M. SREENIVASULU		
11	17JU1A0147	K. SURYAPRAKASH REDDY	Industrial building design by using steel members	Dr.E.Neelu Priya
12	17JU1A0135	L. SAIPRATAP REDDY		
13	17JU1A0109	B. DEEPIKA		
14	17JU1A0139	P. SAVITHRI		
15	17JU1A0110	S.DEVARAJU		
16	17JU1A0120	V. KRISHNA REDDY	Analysis and Design Of RC Building Based On plan	Mr.K.Rajasekhar
17	18JU5A0112	B. VINOD		
18	18JU5A0107	CH. RANGASWAMI		
19	17JU1A0113	A. HARISH		
20	17JU1A0119	D. KAJA HUSSAIN		
21	17JU1A0137	K. SANDHYA RANI		
22	17JU1A0138	K. SHANTHI

ABSTRACT

Power pulsations are one of the factors that impede the adoption of electric vehicles (EVs) equipped with dynamic wireless power transfer (WPT) systems. The unstable output voltage, current and power parameters, which are common for such systems, can be mitigated by incorporating a DC-DC converter and a controller into the system. The given manuscript analyses the performance of the ProportionalIntegral (PI) feedback controller and a Fuzzy controller, which are utilized to manage the output of the Buck-Boost converter of the wireless charging systems for EVs. The dynamic WPT system under consideration is simulated using a graphical programming environment. It was revealed that both controllers significantly reduce the power pulsation. However, PI controller reduces the power pulsation ratio from 40% to almost 0% after 0.45 s, whereas Fuzzy controller decreases the power pulsation ratio from 40% to nearly 5% after 0.09s.

ABSTRACT

This project introduces non-electrical input based artificial neural network (ANN) maximum power point tracking (MPPT) technique to the solar powered water pumping system using brushless DC (BLDC) motor. The objective is to model a step size independent MPPT using neural network for water pumping application. A DC-DC boost converter is being utilized which is driven by ANN based MPPT to extract maximum power out of solar photovoltaic (SPV) array and also responsible for soft starting of BLDC motor. Pulse width modulated (PWM) control of the voltage source inverter (VSI) using DC link voltage controller is used to control the speed of the BLDC motor. PWM signal is generated using the inbuilt encoder to perform the electronic commutation by hall signal sensing. Performance analysis of a BLDC motor driving pump system is carried out under the MATLAB/Simulink environment and efficiency of the overall system is calculated under various irradiance conditions.

ABSTRACT

The decay of power quality is one of the principle issues of electrical distribution systems. One of the main reasons for this is the use of non-linear devices like the switching devices and the power electronics converters. Non-linearity leads to detrimental effects on the utility of the power supply, system efficiency, reduction in power factor, etc. The reactive power is increased due to the reduction in power factor and it does not have any contribution in the transfer of energy, hence its compensation is needed. In this paper, the Artificial Neural Network (ANN) and Adaptive Neuro Fuzzy Inference System (ANFIS) based control methods for a Three-Phase Distribution Static Compensator (DSTATCOM) are proposed. This is used for compensation of the reactive power along with the current related power quality issues that include harmonics. These control methods are simulated in the MATLAB environment with the help of SIMULINK toolbox. The simulation results suitably demonstrate the performance of these methods and it is found that source current waveform with lesser distortion are achieved with ANFIS as compared to ANN.

Index Terms—Power Quality Compensation; MATLAB; DSTATCOM; Synchronous Reference Frame Theory; Adaptive Neuro Fuzzy Inference System; Artificial Neural Network;

ABSTRACT

Solar inverter is a power electronic based converter which acts as interfacing media between solar PV panels and utility grid. IEEE 1547 has imposed limit on the magnitude of current harmonics around the inverter switching frequency. This limit necessitates the use of AC side filter at the output of the grid connected solar inverter, for connection with grid. This filter reduces the harmonic content in grid current so as to inject pure sinusoidal waveform into the grid. The filter should be so designed that it provides sufficient attenuation for the switching frequency harmonics but at the same time should allow a low impedance path for the fundamental component. More over the system size / volume must not increase significantly with the addition of filter. The AC side filter design needs the trade-off when considering the efficiency / switching loss and fundamental voltage drop. In this paper control theory modelling of LCL type filter is developed. Comparison of LCL filter with other filter topologies is carried out with respect to the control theory parameters like Bode plot. Detailed calculation of LCL filter for single phase grid connected solar inverter is also elaborated.

Index Terms— LCL filter, grid tied solar inverter, control theory modelling, transfer function, Bode plot, root locus

DEPARTMENT OF MECHANICAL ENGINEERING

CERTIFICATE

This is to certify that the report entitled "DYNAMIC ANALYSIS OF CAM SHAFT USING FEA" the bona fide work carried out by V PAVAN KUMAR (17JU1A0317), V SAI TEJA (17JU1A0319), V CHENNAKESHAVULU (17JU1A0303), P MURALI KUMAR (17JU1A0310), K NAVEEN KUMAR (17JU1A0315) in partial fulfilment of the requirements for the award of Degree of Bachelor of Technology in the Department of Mechanical Engineering, from JNTUK during the year 2017-2021.

PROJECT GUIDE

Mr. P V ANIL KUMAR, M.Tech.

Associate Professor

HEAD OF THE DEPARTMENT

Mr. N SAMEER CHAKRAVARTI JULA,

M.Tech.

Associate Professor

EXTERNAL EXAMINER

A handwritten signature in blue ink, likely belonging to the Principal or Head of the Department, is positioned above the official stamp.

YEAR: IV B.TEHC II SEM (17 BATCH)

DATE: 26-07-2021

FINAL PROJECT VIVA-VOCE

TIMINGS: 10.00 AM TO 5.00 PM

Dear students, the final project viva-voce is scheduled on 28-07-2021 as per above timings mentioned. All students are informed to attend without fail.

PROJECT CO-ORDINATORS:

- 1) X. RANJITH KUMAR (ECE-A)
- 2) V. RAMA SUBBA REDDY (ECE-B)

Windows 10 desktop showing a presentation slide titled "ABSTRACT".

ABSTRACT

Traditional method that is commonly used in fields is by taking the customer's order and writing it down on a piece of paper. Many solutions have been proposed for solving this issue. This Project is going into attempt in the same direction. This system makes use of X-Box as a communication device and LCD Display module compatible with Arduino Uno as hardware.

Automation plays a very important role in every field of human life. The project has Arduino Uno microcontroller which is interfaced with input and output modules. The inputs are push buttons which connected to LCD Liquid Crystal Display which takes input from the user and provides some information to the microcontroller. All these information is send by X-Box transmitter to receive side. At receive side also one X-Box transmitter is there which collects the information send given to USB or TTL USB UART converter, which sends the information serially to the PC. The software takes the information from the PC and brings the given content back to the customer from the kitchen.

Windows taskbar and network tray are visible on the right side.

Windows 10 desktop showing a presentation slide titled "ARDUINO UNO CONTS...".

ARDUINO UNO CONTS...

- It's flash memory is 32kb.
- Static Ram is 2kb.
- It operates at 16MHz
- EEPROM is 512 b.

Technical specifications table:

Reset Switch		Digital Pins
USB Connector		16 Digital I/O
Microcontroller Chip		Microcontroller
Display Module		Analog Input Pins
Relay Module		
Power Pin		

Windows taskbar and network tray are visible on the right side.

(b) All pass filters:

- (i) All pass filters are used to adjust or compensate phase of another system.
- (ii) If the phase of filter is not linear in pass band, the all pass system is connected in cascade with the filter, so that the overall phase of the system will become linear.

overall phase of system becomes linear in pass band

Application: A common application of all pass filter in electronic music,

SUMMARY

Sanitation is the effective use of tools and actions that keep our environment healthy. The seincludelatrine so toilets to manage waste, food preparation, washing stations, effective drainage and other such mechanisms. Hygiene is a set of personal practices that contribute to good health. Clean drinking water, hygiene, and sanitation play an important part in maintaining health. Contaminated water causes many water-borne infection slik ediarrhoea, and also serves as a carrier for vectors such as mosquitoes spreading epidemics. So, it's important to maintain the hygiene around us to keep yourself clean and germs-free.

Background: Personal hygiene deficiency diseases have been found to be a serious public health problem and people often affected are school children. These have been attributed to in adequate knowledge of personal hygiene and its practices. **Promoting hygiene behaviours:** We mobilize communities through hand washing campaigns, integrating hygiene into school curricula and promoting sanitation.

Supplying hygiene products and services: By providing hygiene kits during emergencies and supporting schools to build hand washing facilities, we help to ensure that everyone has the right hygiene products and services with in reach.

Supporting girls and women with menstrual hygiene management: We work to strengthen confidence, knowledge and skills among girls and women to manage their menstruation safely, know what to ask for when they get their period, and use clean materials and facilities.

REPORT

Giddaluru is a town in the Prakasam district of the Indian state of Andhra Pradesh. It is the Mandal head quarters of the Giddaluru Mandal in the Markapur revenue division. It was part of the Kurnool district till 1969 later it was merged into the Prakasam district in 1970. Till 2008 it was under the Nandyal

parliaments segment after delimitation it was missed to the Ongole MP segment. Because during the Britisher's rule it was in Kadapa district later moved to Kurnool and the in 1970 merged into the Prakasam district.

As we entered into the village

first, we approached the higher authorities in Grama sachivalayam and we explained about our project in detail to them and also we take some information from them which is useful to our project. After that we divided into 2 groups and we collected a data from 100 families about their occupation, education and Health issues. During our survey we identified some problems about their health issues and hygienes of their lives. We also suggested some short and long term action plans for the problems we identified in the village during the socio economic survey of our community service project.

SUMMARY

According to the community service project we all formed a group and selected a best topic which will help for the common people in their future and the topic name is “**Right to Information Act(2005)**”. In general so many people staying in villages don't know about this act and uses of this RTI act due to illiteracy.

We entered into a village called **Thippayapalem**, Markapur Mandal, which was selected by our group members. We met with the main secretary of sachivalayam, later we explained about the purpose of visiting, about the RTI act and got permission into the village for our awareness campaign.

In the village we started our campaign from nearest ZP High School and educated the students reg. RTI act, the principal got impressed for our work and encouraged us with his valuable suggestions. Later we met the people staying in that village and explained about the importance of the act in a polite way. In this part of our campaign we got to know a lot about the village people and the way they treated was really impressive. We almost met the entire village through this campaign explaining about the rights to each and every family and clarified their doubts as per our knowledge in a convenient way. Along with the RTI act we have also educated the people about the importance of girl education, human rights, right to vote etc. Finally we ended our campaign by making the rural people into responsible citizens.

REPORT

We are selected a village to do our project and name of the village is "THIPPAYAPALEM". Thippayapalem is a village in Markapur Mandal, Prakasam district. It is 11 kms to Markapur mandal. The pin code of Thippayapalem is 523329 and postal head office is Vemulakota. Such a beautiful village it was, in that village people was very interactive with students. This village is a place that is far away from the pollution and noise of the city. Also, you feel a connection with the soil in a village. Moreover, there are trees, a variety of crops, diversity of flowers, etc. Besides all this, you feel the cold breeze at night and a warm but pleasant breeze in the day.

Lord Shiva and Sri Veerabrahmaendra Swamy Temples are famous in this Village. Thousands of People Reach this Village on Shivaratri Festival. Competition for bulls is famous on this day. Reservoir Constructed in British time. Venkata Ramana Reddy Kunduru. Thippayapalem Local Language is Telugu. Thippayapalem Village Total population is 2874 and number of houses are 740. Female Population is 47.8%. Village literacy rate is 44.6% and the Female Literacy rate is 15.4%.

OBJECTIVES

- Promote transparency & accountability in the working of the government. Contain corruption. Make our democracy work for the people in real sense. An informed citizenry will be better equipped.
- An Act to provide for setting out the practical regime of right to information for citizens to secure access
- To information under the control of public authorities, in order to promote transparency and accountability in the working of every public authority, the constitution of a Central Information Commission.
- Empower citizens to question the government. The act promotes transparency and accountability in the working of the government.
- The act also helps in containing corruption in the government and work for the people in a better way.
- Empower the citizens. Promote transparency & accountability in the working of the government. Contain corruption. Make our democracy work for the people in real sense.
- The primary aim of the Right to Information Act is to empower the citizens of a country. To achieve this, the government of the country should work to promote transparency
- Accountability in work done by the Government, eradicate corruption and make the democracy work in favour of the citizens in a real sense.
- The basic objective of the RTI Act is to empower the citizens, promote transparency and accountability in the working of the Government, contain corruption, and make our democracy work for the people in the real sense.

OUTCOMES

- The right to information act was passed in the year 2005. This law empowers Indian citizens to seek any accessible information from a Public Authority and makes the Government and its functionaries more accountable and responsible.
- The Right to Information (RTI) Act influences the people and impact on Indian Administration in greater transparency in functioning of public authorities.
- Disclosure of information regarding government rules, regulations and decisions, every public authority is mandated to maintain all records duly cataloged.
- It replaced the former Freedom of Information Act, 2002. Under the provisions of RTI Act, any citizen of India may request information from a "public authority" (a body of Government or "instrumentality of State") which is required to reply expeditiously or within thirty days.
- The Act extends to the whole of India except Jammu & Kashmir. It provides a very definite day for its commencement i.e. 120 days from enactment. It shall apply to Public Authorities.
- The RTI empowers people to seek information from the government and public organizations and ask for government documents and their copies.
- Through the RTI, citizens know about government decisions and the limitations of the country and the government. RTI promotes transparency and accountability.

SUMMARY

Many people tend to associate eating with health these days and information about the health consequences of certain foods is ubiquitous both in lay blogs and professional guidelines. In view of this widespread information of the health consequences of food, the actual scientific evidence for protective or harmful effects of specific nutrients or foods is surprisingly weak or mixed, and in many cases subject of heavy debate amongst researchers. When reading syntheses of the existing literature, such as those made by the Cochrane group that has produced more than hundred reviews on nutrition and health, it becomes obvious that there are very few robust effects of single nutrients or single foods on health (either positive or negative) with cautious conclusions in terms of 'modest benefits/harmful effects are observed although more evidence is required to confirm this in most cases. This even holds for the classic major culprits of an unhealthy diet such as sugar, fat and salt, and for the classic reipe for a healthy diet .

REPORT

These days, families have busy schedules, making it hard for all to have homemade meals day after day. The diet of most children are often in the form of takeout and convenience food. However, such foods tend to be quite unwholesome, creating a harmful effect on their health. Many of these effects are caused by unhealthy eating that can extend to their adulthood too and might even result in lifelong ailments.

Healthy eating for kids can bring several benefits for growing children. They are:

- Maintain optimum energy levels
- Perk up minds.
- Harmonize moods.
- Sustain healthy weight.
- Check conditions of mental health such as anxiety, ADHD, depression etc.

Besides, by preparing foods according to healthy recipes for kids, they form wholesome eating habits that tend to remain with them all through their lives.

Providing healthy meals for kids as well as emphasizing nutrition remain a few of the most important and simplest means to avert the onset of potential diseases. Healthy foods for kids can also lessen the chances of chronic diseases, such as heart disease, obesity, type II diabetes and high blood pressure.

OBJECTIVES

The main objective, recommendations and advices given by CSP Team members at the end of the project to these people during the collection of data on selection of foods for promoting health, preventing disease and maintaining or losing weight. These are general guidelines that apply to most healthy people.

*Build Healthy Eating Habits

* Family having a healthy fruit snack

*Eat a variety of vegetables, especially dark green, red, and orange vegetables (3 or more servings a day).

*Eat a variety of fruits (2 or more servings a day).

- Aim for Fitness
- Maintain or work toward a healthy weight.
- Be physically active every day-return fun and play to your life.
- vigorous physical activity for at least 30 minutes a day 5 days a week
Healthy eating provides the sustained energy you need to be physically active
- Learn to manage your stress with exercise, healthy eating, relaxation, and good coping skills
- Eat whole-grain high-fiber breads and cereals (3 to 6 servings a day)
Reduce or eliminate refined or processed carbohydrates, most of the grains in your diet should be whole grains.
- Choose from a variety of low-fat sources of protein-including eggs, beans, poultry without skin, seafood, lean meats, unsalted nuts, seeds, and soy products. If you eat meat, eat white meat at least four times more often

OUTCOMES

The way you talk about food has a big effect on your child's eating habits. Try to emphasize all of the good things about healthy eating, instead of focusing on the effects of unhealthy eating. These ideas might help:

- Avoid restricting foods or describing them as 'good', 'bad', 'naughty' and so on. Instead, aim for balance – eat healthy most of the time, and every now and then you might like to eat 'sometimes' foods.
- Teach your child to eat when they're hungry and to stop when they're full. This helps your child learn to recognize whether they're eating out of true hunger or eating out of boredom or tiredness. But you can expect your child to eat a lot more while they're growing and developing.
- Talk with your child about how food can help with concentration, school, sports performance and wellbeing. This can motivate your child to make healthy choices, and it'll probably mean more to your child than information about longer-term health risks.
- Talk about your enjoyment and interest in the healthy food you're eating. This can encourage your child to enjoy eating healthy food too.

SUMMARY

According to the Community Service Project we are all form a group and selected a best topic, what will help for socio – economic by our group. The topic name is "Plantation".The Plantation is a usually large group of the plants and they are in under our civilizations.

We are entered into that village/ Community what was selected by our group by the Permission of the Sachuvalayam Main Secretary of that village and Our group meets are explain about the habitation was taken us to the secretary, that means about plantation and its Awareness. And finally, we are interacting to the of that village in polite way and village people are very co-operative to us.

We are giving awareness about plantation in village and its importance. In that way we are all explain about the plantation at near the houses and we talked about the advantages to each and every family.

And we are changed the normal family houses into greenery houses by our awareness Programs. And we collected the so many family names and their doubts and we rectify those doubts of theirconvenience way to each family in the village. And we are all give the awareness about the different types of medical plants, what will growin their houses.

DEPARTMENT OF CIVIL ENGINEERING
REPORT

We are selected a village to do our project. Name of the village is "CHENNARAYUNI PALLE ". Chennarayunipalle is a village in Markapur Mandal, Prakasam district. It is 3.5 kms to Markapur mandal. Such a beautiful village it was, in that village people was very interactive to our people. This village is a place that is far away from the pollution and noise of the city. Also, you feel a connection with the soil in a village. Moreover, there are trees, a variety of crops, diversity of flowers, etc. Besides all this, you feel the cold breeze at night and a warm but pleasant breeze in the day.

Healthy eating contributes to an overall sense of well-being, and is a cornerstone in the prevention of a number of conditions, including heart disease, diabetes, high blood pressure, stroke, cancer, dental caries and asthma. For children and young people, healthy eating is particularly important for healthy growth and cognitive development. Eating behaviors adopted during this period are likely to be maintained into adulthood, underscoring the importance of encouraging healthy eating as early as possible.

Village life is known to be calm and pure as people are closer to the nature in villages; however, it also has its own set of challenges. Though, the people living in village areas lead a peaceful life they are devoid of many modern amenities that make life comfortable. Traditional village life is devoid of the comforts that a city life offers in village. Whether conditions is very cool and peace. And we saw and shocked that some many trees are planted in that village they giving so much of oxygen and fresh air to that village area. Nutrition may play an important role in the increasing burden of cancer, obesity, diabetes, and cardiovascular diseases. In addition to physical activity, a diet rich in vegetables, fruits, and fibers are recommended, along in that place.

DEPARTMENT OF CIVIL ENGINEERING OBJECTIVES

- Tree plantation means planting trees and plants. The purpose of tree plantation is to save the endangered environment and to beautify our life. Trees are valuable gifts of nature. They are known as the best friends of human beings.
- The objective tree describes the desired future situation and is a step towards designing what the project will do. It can help you determine the outputs, outcome, and impact of your project.
- It looks up- stream at causes and determinants and downstream at consequences and effects.
- This brings several advantages: Real, present issues - rather than apparent, future or past issues are dealt with and identified
- The problem can be broken down into manageable and definable chunks.
- Also called means-ends tree or solution tree, this tool allows us to transform from the problem tree the causes (roots) into means.
- The effects (leaves) into ends , besides guiding us towards the analysis of alternatives by taking the means into strategies.
- Education. Passing an exam is an objective that is necessary to achieve the goal of graduating from a university with a degree.
- Career. Gaining public speaking experience is an objective on the path to becoming a senior manager.

DEPARTMENT OF CIVIL ENGINEERING OUTCOMES

- Planting trees is so satisfying. You dig a hole, put a tree seedling in the ground, fill the hole with soil, and voila, you have done something good for the planet and future generations.
- It's not surprising that governments, businesses, conservation organizations and people everywhere are talking about planting trees and lots of trees.
- Tree planting has been promoted globally as the silver bullet to solve multiple environmental and social problems, and, indeed, well-planned tree planting along with other strategies to protect.
- Increase forest cover can provide many benefits to people and the millions of other species that depend on forests. But tree planting can have unintended consequences and requires extensive planning and an ongoing commitment to achieve the desired outcomes.
- Trees create jobs, provide flowers, fruit, fodder and fuel to communities and living creatures, offer shade to nomads and their livestock, give shelter to birds and animals, prevent soil erosion and flooding, improve water catchment, generate oxygen, reduce pollution and benefit posterity while decarbonizing.
- The objectives of tree plantations are to know the value of environment, benefits of trees, beautification in and around the school.
- Tree plantation is a great way to increase student's interest in their local environment and achieve academic goals.

SUMMARY

A socialist-economic survey is regarded as one of the most important sources of statistical data on household Surroundings as well as other data on the status of housing, individual and household characteristics and living conditions.

In this Project, Firstly, I had collected the state Socio economic survey report from the websites provided by the Andhra Pradesh Government. After studying the survey report of the government, I noted the Socio economic condition of the State.

At the time of our Community Service Project .We choose Pedaraveedu Village as our habitation centre. So we Survey 2 days for Project Completion. We take Water facilities and drinking water availability as our project. Which is most important and mandatory to survive/live? It is the most important thing in life. Without water we can't do any work (daily usages, construction, travelling, cleaning, washing, farming....etc.)

In this project we want survey How many has facilities of water & How many has Drinking water availability in village & What are the problems in village. During this survey we are all collect nearly 100 families details and his problems. We all have 8 members in project. We are form as two batches to survey. Team lead explain about our survey to peoples and families. When she was explaining after that other's are collecting information about his/her facilities & problems. We survey the nearly 150 families and take report of 100 families. We take the report of total how many females and males are there & total strength of village.

OBJECTIVES

- Safe and readily available water is important for public health, whether it is used for drinking, domestic use, food production or recreational purposes.
- Improved water supply and sanitation, and better management of water resources, can boost countries' economic growth and can contribute greatly to poverty reduction.
- To initiate team processes with the student groups for societal change.
- supply and securing of clean and sufficient drinking water for the population, provision and securing of access to sanitation.
- Improvement and restoration of soil quality and thus, raising productivity rates; reducing the impact of natural hazards.
- Water conservation objectives protect natural water bodies and their aquatic environments.
- These objectives relate to the volume and quality of water to remain in rivers for the protection of a natural water body and its aquatic environment.
- Agricultural water management (AWM) seeks to use water in a way that provides crops and animals the amount of water they need.
- Enhances productivity, and conserves natural resources for the benefit of downstream users and ecosystem services.
- Although AWM includes irrigation, it is not simply about applying water.
- The main objective of the National Water Mission (NWM)
- Conservation of water, minimizing wastage ensuring its more equitable distribution both across and within States through integrated water resources development and management.

OUTCOMES

- Safe and readily available water is important for public health, whether it is used for drinking, domestic use, food production or recreational purposes.
- Improved water supply and sanitation, and better management of water resources, can boost countries' economic growth and can contribute greatly to poverty reduction.
- A water system facility can be any location or facility related to the public water system. Examples include distribution systems, treatment plants, wells.
- Having clean water and sanitation means being able to avoid exposure to countless diseases.
- Every year, millions of people die from diseases caused by inadequate water supply, sanitation, and hygiene.
- Other than pneumonia, diarrhea is the main cause of death in children.
- Uses include for drinking, food preparation, washing hands, bathing/showering, brushing teeth, toilet flushing (if there is a flush toilet), cleaning, washing clothes and dishes, and watering plants. Water is essential for the proper functioning of the body.
- Drinking water in India is mostly derived from groundwater that is pumped via hand pumps from bore wells, tube wells, dug wells, and surface water sources like rivers, streams, ponds and lakes.
- Project proposals are documents that define your project, including things such as start and end dates, objectives and goals. They tell stakeholders why your project ideas should be executed.
