## ABSTRACT

The consumption rate of fossil fuels increases promptly with the rapid deterioration of mineral resources. The associated pollution has led the researchers's attention to the development of experimental and simulation based different renewable energy models. However, hybrid renewable energy sources are more efficient, reliable, and cost-effective than single renewable energy sources. For unbound localities where typical electrifications are difficult to reach, a self sustainable PV-wind hybrid system imparts a viable solution. Wind energy conversion systems (WECS) and solar photovoltaic (PV) systems are considered for this proposed hybridization of the energy source model. This project has been developed for a standalone PV-wind hybrid generation system by considering different environmental conditions on MATLAB/Simulink software. The design of both WECS and PV systems is based on mathematical expressions developed in MATLAB/Simulink. The wind turbines so called the heart of WECS consist of a permanent magnet synchronous generator (PMSG) and a rectifier for providing DC power to the load. The unregulated DC power output procured from a PV system, further regulated by a boost converter which is integrated with a maximum power point tracking (MPPT). WECS and solar PV subsystems are imparted energy to the same DC bus where the total energy is utilized for the common DC load. The presented unique performance analysis will help the researchers to explore PV-Wind hybrid generation system for further improvements.

## Abstract

Solar energy is one of the most promising energy sources that can meet the ever-increasing demand for electricity in the world. But due to the lower efficiency of solar photovoltaic (PV) cells and dependency on environmental conditions, it is necessary to track the Maximum Power Point (MPP) of the solar PV system. Hence, different Maximum Power Point Tracking (MPPT) methods are implemented with solar PV systems but one of the main problems associated with maximum power point tracking methods is the designing of a DC-DC converter. This paper depicts a detailed comparison between the performance of a Boost Converter and Buck-Boost converter for the maximum power point tracking of a solar PV system with Artificial Neural Network (ANN) because ANN based MPPT model provides remarkably fast tracking speed and higher efficiency. To understand the designing of a suitable DC-DC converter for MPPT with ANN, for different values of the passive elements in the converter, the response of the DC-DC converters are represented through comparison. All the test results and graphs of this paper were conducted in MATLAB/Simulink environment. The outcome of the simulations will provide a clear conception to the future researchers to predict the behaviors of the mentioned converters and design the most efficient converter accordingly for solar MPPT.

## Abstract:

Electric Vehicles (EVs) employment has been widely spread recently due to their environmental-friendliness. Many research efforts are being put into developing the charging infrastructure to meet the customer needs while complying with international power quality standards. Accordingly, this work presents the development of a single-stage single-phase SEPIC-based Power Factor Correction (PFC) charger. The analysis and modeling of the proposed system are presented. The Discontinuous Inductor Current Mode (DICM) operation is considered for the SEPIC converter since it behaves as a purely resistive load as seen from the grid. MATLAB/Simulink is used to simulate the system for validation and evaluation purposes of the proposed design. Moreover, a lab prototype operating at a 1.5kW power level is built. The obtained results indicate a unity power factor (PF) and a total harmonic distortion (THD) of the input current at 1.5%, meeting the required standards.

## ABSTRACT

PV modules are used to directly convert solar energy into electrical energy. The essential input variables required for these modules are weather data such as solar irradiance and temperature. Output generated may be in the form of voltage, current or power which are necessary to plot and study the (P-V& I-V) characteristics of the PV modules. The outputs are immediately affected by any variation in the input variables and it is necessary to study the impacts of variation in physical data (input variables) on the power generated by the PV modules. Therefore, an accurate design of PV module is required before implementation in solar PVS. This paper presents a step-by-step designing of a PV module in detail. The configuration of PV cells considered in the design is single diode model-based consisting of series as well as parallel resistor for better accuracy. The model is step-by-step simulated and tested in MATLAB/Simulink. Behavior of module in variable weather conditions such as solar irradiance and temperature has been studied and value of series and parallel resistance for optimum output have also been approximated.

**Index Terms**— Irradiance, temperature, PVS, PV module, IV & P-V characteristics, MATLAB/Simulink.

## ABSTRACT

In the early phases of ac to dc inverters/ converters which were line commuted, the line current was square in shape. It contained higher order harmonics which generates electromagnetic induction which in turn causes heating of the core of power transformers or distribution transformers. Simple pulse width modulation based inverters which uses MOSFET/IGBT has high switching loss, and it has quite low reliability and the power handling capability in comparison to using thyristor /SCR. In case of thyristor-based inverters, pulse width modulation is not feasible due to commutation circuits. In dc to ac conversion, it is desired that the output waveform resembles a sine wave as much as possible and harmonic content must be low. In this paper, a multilevel inverter topology has been presented in which switching angle has been controlled and three phase ac to dc converter circuits are used in inversion mode. Since there is natural commutation, there is no requirement of a separate circuit for synchronization. In this paper, simulation is performed for grid tied three-phase 12 pulse converters. The solar PV systems are incorporated for DC source. The converter is analyzed by varying DC source voltage, Inductance and varying the switching angles so that the total harmonic distortion is reduced.

## ABSTRACT

With the expanding worry over the earth and ever-stringent outflow guidelines, the electric vehicle has been researched as an effective type of transportation. Battery charger topologies in Electric vehicle assume a significant job to expand the penetration of Electric Vehicles. In this paper, an onboard plug-in battery charger for electric vehicle is developed supporting SEPIC and resonant inverter or LLC topology suitable for neighborhood electric e-bikes with a battery pack of 48V. With the charger architecture, a 1KW charging topology as a prototype is designed to charge a 48V Li-ion battery. The onboard charger is simulated simulated using MATLAB/Simulink and the result is validated.

## SUMMARY

Many people tend to associate eating with health these days and information about the health consequences of certain foods is ubiquitous both in lay blogs and professional guidelines. In view of this widespread information of the health consequences of food, the actual scientific evidence for protective or harmful effects of specific nutrients or foods is surprisingly weak or mixed, and in many cases subject of heavy debate amongst researchers. When reading syntheses of the existing literature, such as those made by the Cochrane group that has produced more than hundred reviews on nutrition and health, it becomes obvious that there are very few robust effects of single nutrients or single foods on health (either positive or negative) with cautious conclusions in terms of 'modest benefits/harmful effects are observed although more evidence is required to confirm this in most cases. This even holds for the classic major culprits of an unhealthy diet such as sugar, fat and salt, and for the classic recipe for a healthy diet .

*Prof.*

## REPORT

These days, families have busy schedules, making it hard for all to have homemade meals day after day. The diet of most children are often in the form of takeout and convenience food. However, such foods tend to be quite unwholesome, creating a harmful effect on their health. Many of these effects are caused by unhealthy eating that can extend to their adulthood too and might even result in lifelong ailments.

Healthy eating for kids can bring several benefits for growing children. They are:

- Maintain optimum energy levels
- Perk up minds.
- Harmonize moods.
- Sustain healthy weight.
- Check conditions of mental health such as anxiety, ADHD, depression etc.

Besides, by preparing foods according to healthy recipes for kids, they form wholesome eating habits that tend to remain with them all through their lives.

Providing healthy meals for kids as well as emphasizing nutrition remain a few of the most important and simplest means to avert the onset of potential diseases. Healthy foods for kids can also lessen the chances of chronic diseases, such as heart disease, obesity, type II diabetes and high blood pressure.

## OBJECTIVES

The main objective, recommendations and advices given by CSP Team members at the end of the project to these people during the collection of data on selection of foods for promoting health, preventing disease and maintaining or losing weight. These are general guidelines that apply to most healthy people.

### \*Build Healthy Eating Habits

\* Family having a healthy fruit snack

\*Eat a variety of vegetables, especially dark green, red, and orange vegetables (3 or more servings a day).

\*Eat a variety of fruits (2 or more servings a day).

- Aim for Fitness
- Maintain or work toward a healthy weight.
- Be physically active every day-return fun and play to your life.
- vigorous physical activity for at least 30 minutes a day 5 days a week  
Healthy eating provides the sustained energy you need to be physically active
- Learn to manage your stress with exercise, healthy eating, relaxation, and good coping skills
- Eat whole-grain high-fiber breads and cereals (3 to 6 servings a day)  
Reduce or eliminate refined or processed carbohydrates, most of the grains in your diet should be whole grains.
- Choose from a variety of low-fat sources of protein-including eggs, beans, poultry without skin, seafood, lean meats, unsalted nuts, seeds, and soy products. If you eat meat, eat white meat at least four times more often

Phone No: 08596-200330, 331,332 E-Mail: [principal@kics-anna.com](mailto:principal@kics-anna.com) Web: [www.kics-anna.com](http://www.kics-anna.com)

### OUTCOMES

The way you talk about food has a big effect on your child's eating habits. Try to emphasize all of the good things about healthy eating, instead of focusing on the effects of unhealthy eating. These ideas might help:

- Avoid restricting foods or describing them as 'good', 'bad', 'naughty' and so on. Instead, aim for balance – eat healthy most of the time, and every now and then you might like to eat 'sometimes' foods.
- Teach your child to eat when they're hungry and to stop when they're full. This helps your child learn to recognize whether they're eating out of true hunger or eating out of boredom or tiredness. But you can expect your child to eat a lot more while they're growing and developing.
- Talk with your child about how food can help with concentration, school, sports performance and wellbeing. This can motivate your child to make healthy choices, and it'll probably mean more to your child than information about longer-term health risks.
- Talk about your enjoyment and interest in the healthy food you're eating. This can encourage your child to enjoy eating healthy food too.

## **SUMMARY**

A sociolect-economic survey is regarded as one of the most important sources of statistical data on household Surroundings as well as other data on the status of housing, individual and household characteristics and living conditions.

In this Project, Firstly, I had collected the state Socio economic survey report from the websites provided by the Andhra Pradesh Government. After studying the survey report of the government, I noted the Socio economic condition of the State.

At the time of our Community Service Project We choose Peddaraveedu Village as our habitation centre. So we Survey 2 days for Project Completion. We take Water facilities and drinking water availability as our project. Which is most important and mandatory to survive/live. It is the most important thing in life. Without water we can't do any work (daily usages, construction, travelling, cleaning, washing, farmingg....etc.,)

In this project we want survey How many has facilities of water & How many has Drinking water availability in village & What are the problems in village.

During this survey we are all collect nearly 100 families details and his problems. We all have 8 members in project. We are form as two batches to survey. Team lead explains about our survey to peoples and families. When she was explaining after that other's are collecting information about his/her facilities & problems.

We survey the nearly 150 families and take report of 100 families. We take the report of total how many females and males are there & total strength of village. We observe the report Distribution of Selected Sample Households according to Gender in above table.

## OBJECTIVES

- To facilitate an understanding of the issues that confront the vulnerable/marginalized sections of society.
- To initiate team processes with the student groups for societal change.
- To provide students an opportunity to familiarize themselves with the urban/rural community they live in.
- To enable students to engage in the development to the community.
- To plan activities based on the focused groups.
- To know the ways of transforming society through systematic programmed implementation.
- We sensitize the living conditions of the people who are around them,
- It can help us to realize the stark realities of the society.
- To bring about an attitudinal change in the students and help us to develop societal consciousness, sensibility, responsibility and accountability
- It can make us aware of their inner strength and help us to find new solutions to the social problems.
- To make us the socially responsible citizens who are sensitive to the needs of the disadvantaged sections.

## OUTCOMES

- Provide the more water with tankers.
- Decrease the cost of mineral water
- Provide water plant in village
- Provide chali vendram during summer to drink water
- During summer season there is a more scarcity of water provide more water to use.
- Construct the proper drainage system in village
- Increase the rain water harvesting places to store rain water
- Establish the road Facilities
- Increase the Transport Facilities
- Establish the Sagar tap water Connection to every house
- Increase the drinking water facilities.
- Supply the proper amount to water to daily house hold needs

To

The Superintendent Engineer,

O & M Circle,

APGENCO, SRBPH,

Srisailem Project-518102,

Respected Sir,

Sub: KCIT, Markapur -Schedule for industrial visit in your esteemed firm-request for permission-reg.

\*\*\*\*

Ours is one of the reputed institutions that provide Engineering education to the students. We should be grateful if you could schedule an industrial visit for our students in your esteemed organization. We look forward to develop a long-term association with your firm and request your confirmation for the above mentioned proposal. I request you to kindly permit the III & IV year students of B.Tech ( Mechanical Engineering). Kindly request your good self to have the industrial visit preferably 7<sup>th</sup> (or) 8<sup>th</sup> -Jan-2022.

No.of Persons : Mechanical Engineering Students - 40

Staff - 03

Total - 43

Thanking you,

HOD/Mechanical

Sir,

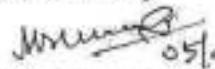

Sub: APGENCO - SRBPH – O&M Circle -Visit to the Srisaillam Right Bank Power House Permission – Accorded - Reg.

Ref:- Your letter Dated: 03.01.2022.

With reference to the letter cited above, you are informed that B.Tech. III & IV year Mechanical Engineering students numbering about 40 members alongwith Faculty 3 members of your college are permitted to visit the Srisaillam Right Bank Power House on 08.01.2022 (Saturday).

1. Cameras, cell phones and Electronic items etc., are not allowed inside the Power House.
2. The Students & faculty members should follow the APGENCO Engineers instructions in Power House.
3. Damages are to be born by your College, if any loss/damage occurs with the students & faculty members during the visit.
4. The students & faculty members are advised to take all precautionary measures to avoid any mishap during the visit.
5. The students & faculty members should not use lift in Power House.
6. The students & faculty members are advised to bring their photo identity cards while entering into the Power House.
7. The Faculty members should take care of students regarding the Electrical equipments installed inside the Power House and to maintain the discipline while in around the Power House.
8. Please note that APGENCO is no-way responsible for any mishap/ accidents to the students & faculty members during the visit.
9. The students should maintain personal hygiene, physical and social distance inside power house.
10. The students should not travel unnecessarily to other places during the visiting period.
11. The students must wear Face Mask compulsory in power house premises.

Yours faithfully

### **PLAN OF ACTION FOR COMMUNITY SERVICE PROJECT AND FIELD VISIT**

STEP 1: Create awareness among students regarding technical and non-technical field visits/field work.

STEP 2: Receiving proposals for students

STEP 3: Review of proposals

STEP 4: Assigning faculty Co-Ordinators to implement the task

STEP 5: Identify the student volunteers

STEP 6: Documentation regarding project and field visit

STEP 7: Taking approval from surrounding villages for visit

STEP 8: Visit plan and creating awareness

## SUMMARY

Diabetes is a chronic disease that occurs either when the pancreas does not produce enough insulin or when the body cannot effectively use the insulin it produces. Insulin is a hormone that regulates blood glucose.

Hyperglycaemia, also called raised blood glucose or raised blood sugar, is a common effect of uncontrolled diabetes and over time leads to serious damage to many of the body's systems, especially the nerves and blood vessels.

In 2014, 8.5% of adults aged 18 years and older had diabetes. In 2019, diabetes was the direct cause of 1.5 million deaths and 48% of all deaths due to diabetes occurred before the age of 70 years. Another 460 000 kidney disease deaths were caused by diabetes, and raised blood glucose causes around 20% of cardiovascular deaths. Between 2000 and 2019, there was a 3% increase in age-standardized mortality rates from diabetes. In lower-middle-income countries, the mortality rate due to diabetes increased 13%.

By contrast, the probability of dying from any one of the four main non communicable diseases (cardiovascular diseases, cancer, chronic respiratory diseases or diabetes) between the ages of 30 and 70 decreased by 22% globally between 2000 and 2019.

Engaging in community service provides students with the opportunity to become active members of their community and has a lasting, positive impact on society at large. Community service or volunteerism enables students to acquire life skills and knowledge, as well as provide service.

## REPORT

Cumbum is located at. 15.5669°N 79.1167°E. It has an average elevation of 184 metres (606 ft)

### Transport:

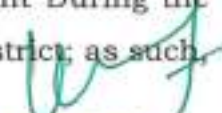

Cumbum railway station provides rail connectivity and is a D-category railway station in the Guntur railway division of the SouthCentral Railway zone. State highways, roads, and the Guntur- Guntakal railway line pass through the town International recognition by UNESCO: The Cumbum Tank was made a World Heritage Irrigation Structure (WHIS) in 2020 by UNESCO

### Education:

The primary and secondary school education is provided by the government's School Education Department. The languages of instruction followed by different schools are Telugu and English.

There are inscriptions at Cumbum and Bestawaripeta, one from 1706, and another from 1729. The first refers to the death of the sheriff Khaja Muhammad, who was the Qiladar of Cumbum fort during the reign of Aurangzeb. The second refers to Muhammad Sahib, son of Muhammad Khayum of Tab and governor of Cumbum during the reign of Muhammad Shah.

It also states that Muhammad Sahib had a mosque constructed at Cumbum during his governorship. These inscriptions prove that this district, like other districts in the Qutub Shahi Kingdom, was once under the Mughal rule. It was formed as part of the Golkonda province, one of the six provinces into which the Deccan Suba was sub-divided int During the British rule, Cumbum tehsil was a municipality of Kurnool district; as such, it had a regimental garrison and a collectorate.

## **OBJECTIVES**

- To facilitate an understanding of the issues that confronts the vulnerable/marginalized sections of society.
- To initiate team processes with the student groups for societal change.
- To provide students an opportunity to familiarize themselves with the urban/rural community they live in.
- To enable students to engage in the development of the community.
- To plan activities based on the focused groups.
- To know the way Of transforming society through systematic programme implementation.
- To create awareness about the health status of the members of the staff and students in the campus.
- To provide counseling for the various health problems of the respondents by a team of doctors.
- To promote awareness about food safety.
- To improve behavior through useful practices connected to personal, water, food, domestic and public hygiene.
- To maintain norms of good health.
- To develop a sense of civic responsibility.
- To ensure adequate, qualitative ,preventive & curative health care to people of the state.

## OUTCOMES

- Cleanliness is not the responsibility of only one person however; it is the responsibility of each and every person living in the home, city and country.
- Good personal hygiene is one of the best ways to protect yourself from getting illnesses such as gastroenterities and the common cold.
- Washing your hands with soap removes germs that can make you to not fall ill.
- Maintaining good person personal hygiene will also help prevent you from spreading diseases to other people.
- Good personal hygiene habits are directly related to less illnesses and better health.
- Good hygiene lowers a person's risk for diseases and illnesses
- Exercising regularly helps to keep fit and prevent diseases.
- A healthy and hygienic life helps to strengthen our body and make us immunate to diseases.
- Hygiene refers to good practices and rituals that prevent diseases and leads to good health.
- The health and hygiene are the two factors that plays an important Role in human's life.
- The life span of human begins is mostly based on the individual's health.
- The health is maintained by taking hygienic food at proper interval of time.
- A person with clean habits can destroy his/her destructive desires and dirty ideas with ease.

**SUMMARY**

According to the Community Service Project we are all form a group and selected a best topic, what will help for socio - economic by our group. The topic name is "Plantation". The Plantation is a usually large group of the plants and they are in under our civilizations.

We are entered into that village/ Community what was selected by our group by the Permission of the Sachivalayam Main Secretary of that village and Our group meets are explain about the habitation was taken us to the secretary, that means about plantation and its Awareness. And finally, we are interacting to the of that village in polite way and village people are very co-operative to us.

We are giving awareness about plantation in village and its importance. In that way we are all explain about the plantation at near the houses and we talked about the advantages to each and every family.

And we are changed the normal family houses into greenery houses by our awareness Programs. And we collected the so many family names and their doubts and we rectify those doubts of their convenience way to each family in the village. And we are all give the awareness about the different types of medical plants, what will growin their houses.

### DEPARTMENT OF COMPUTER & SCIENCE ENGINEERING REPORT

We are selected a village to do our project. Name of the village is "CHENNARAYUNI PALLE ". Chennarayunipalle is a village in Markapur Mandal, Prakasam district. It is 3.5 kms to Markapur mandal. Such a beautiful village it was, in that village people was very interactive to our people. This village is a place that is far away from the pollution and noise of the city. Also, you feel a connection with the soil in a village. Moreover, there are trees, a variety of crops, diversity of flowers, etc. Besides all this, you feel the cold breeze at night and a warm but pleasant breeze in the day.

Healthy eating contributes to an overall sense of well-being, and is a cornerstone in the prevention of a number of conditions, including heart disease, diabetes, high blood pressure, stroke, cancer, dental caries and asthma. For children and young people, healthy eating is particularly important for healthy growth and cognitive development. Eating behaviors adopted during this period are likely to be maintained into adulthood, underscoring the importance of encouraging healthy eating as early as possible.

Village life is known to be calm and pure as people are closer to the nature in villages; however, it also has its own set of challenges. Though, the people living in village areas lead a peaceful life they are devoid of many modern amenities that make life comfortable. Traditional village life is devoid of the comforts that a city life offers in village. Whether conditions is very cool and peace. And we saw and shocked that some many trees are planted in that village they giving so much of oxygen and fresh air to that village area. Nutrition may play an important role in the increasing burden of cancer, obesity, diabetes, and cardiovascular diseases. In addition to physical activity, a diet rich in vegetables, fruits, and fibers are recommended, along in that place.

**DEPARTMENT OF CIVIL ENGINEERING**  
**OBJECTIVES**

- Tree plantation means planting trees and plants. The purpose of tree plantation is to save the endangered environment and to beautify our life. Trees are valuable gifts of nature. They are known as the best friends of human beings.
- The objective tree describes the desired future situation and is a step towards designing what the project will do. It can help you determine the outputs, outcome, and impact of your project.
- It looks up- stream at causes and determinants and downstream at consequences and effects.
- This brings several advantages: Real, present issues - rather than apparent, future or past issues are dealt with and identified
- The problem can be broken down into manageable and definable chunks.
- Also called means-ends tree or solution tree, this tool allows us to transform from the problem tree the causes (roots) into means.
- The effects (leaves) into ends , besides guiding us towards the analysis of alternatives by taking the means into strategies.
- Education. Passing an exam is an objective that is necessary to achieve the goal of graduating from a university with a degree.
- Career. Gaining public speaking experience is an objective on the path to becoming a senior manager.

**DEPARTMENT OF CIVIL ENGINEERING**  
**OUTCOMES**

- Planting trees is so satisfying. You dig a hole, put a tree seedling in the ground, fill the hole with soil, and voila, you have done something good for the planet and future generations.
- It's not surprising that governments, businesses, conservation organizations and people everywhere are talking about planting trees and lots of trees.
- Tree planting has been promoted globally as the silver bullet to solve multiple environmental and social problems, and, indeed, well-planned tree planting along with other strategies to protect.
- Increase forest cover can provide many benefits to people and the millions of other species that depend on forests. Buttrees planting can have unintended consequences and requires extensive planning and an ongoing commitment to achieve the desired outcomes.
- Trees create jobs, provide flowers, fruit, fodder and fuel to communities and living creatures, offer shade to nomads and their livestock, give shelter to birds and animals, prevent soil erosion and flooding, improve water catchment, generate oxygen, reduce pollution and benefit posterity while decarbonizing.
- The objectives of tree plantations are to know the value of environment, benefits of trees, beautification in and around the school.
- Tree plantation is a great way to increase student's interest in their local environment and achieve academic goals.
