

7.3: Institutional Distinctiveness

7.3.1: Portray the performance of the Institution in one area distinctive to its priority and thrust

7.3: INSTITUTIONAL DISTINCTIVENESS

Title: Access to Quality Higher Education to the Rural Society Leading To Regional Development.

Vision statement of the Institute sketches its own distinctiveness on a larger map. As per the Vision statement, the institution prepares internationally acceptable and employable professionals. In addition, the institute aims at preparing professionals with emotional balance, psychological strength and social responsibility and to make them good citizens and good human beings.

Context:

Many studies and surveys in the country revealed most of the professionals are knowledgeable but their attitudes are not fully rational due to emotional imbalance. Some of the students of high caliber (who face competitive exams like JEE) are not able to cope up with the pressures of life and going in to depression. The ethical and human values at the individual and at the organization level degenerated to a level of creating disorderly society. KITS recognized these factors very early and formulated its Vision statement giving stress on development of psychological strength along with high quality academics.

The Practice:

Most of the students who join KITS hail from agricultural families – mainly from socially and economically backward classes. The institute is concentrating on three important aspects – quality academics, psychological balance, and social responsibility. These three aims are essential because large number of students who join the institute are those who aspire for higher education from the rural families, most of them being first graduate-attempts from their families. Their background causes low levels of communication skills, and lack of confidence, and low awareness on social problems.

The institute implements its Vision through the following steps:

Step 1: Empowering the rural youth through:

The institute has taken a policy to educate and motivate the rural youth of the backward communities. In that scenario, KITS has identified the few extremely rural mandals and conducted vigorous campaigning in educating the youth towards the higher education as potential area and convinced them to aim for prospects in higher education.

Step 2: Development of Communication and confidence:

Upon admission, it was observed that the students from these areas were found to be more concentrative on learning activities and inclined towards games and sports, but communication skills and technical knowledge is a challenge for them. In order to mentor them to become industry ready engineers, college has formed empowerment cells and arranged training by reputed agencies like IT curve technologies, ICT, APSSDC and Personality development classes by reputed experts like Yandamuri VirendraNath, GampaNageswara Rao etc., Systemic planning and approach lead the growth in student career as well as progress resulting in placement opportunities in reputed MNCs.

Step 3: Mentoring System:

- KITS also offers a highly-efficient Mentoring system through which a group of students is assigned to a faculty member at the commencement of the program and through the course of stay in the institute.
- Mentors meet their students and guide them with their studies and extra-curricular activities. They also provide advice relating to career guidance and personal problems. The mentoring system ensures that the students adapt to the dynamic learning environment and lead their ways into highly successful careers.
- The counseling and mentoring system of the institution helps the students to overcome their economic issues, family issues and inferiority complex etc., and enable them to compete with others. One faculty is allotted roughly 20 students to concentrate and counsel. These counselors study the student's progress in academics, and their social and family issues which could be distracting from their studies. They plan, advice, and implement corrective measures to improve the students on all the fronts.
- High quality of the academic excellence covers way for the desired outcomes of conceptual learning and technical competency among the students. This is achieved through curriculum design in tune with the global requirement blended with innovative teaching –learning methods.
- Inclusion of Library hour and Departmental Association Activities (DAA) within the class time table to inculcate the habit of referring standard text books and international journals etc. Students utilize these hours to search for information on topics covered in the classrooms and to improve their knowledge and presenting seminars to think critically and analyze different perspectives.

Step 4: Foundations for strong academics:

As the students who join come with varied levels of academic strengths, the Institute has to carefully plan the details of quality education. Rigorous process is followed to recruit faculty, and serious training is given to make them effectively handle the students. Adopting quality content and teaching methodologies, along with strong academic scrutiny systems enables the students to be knowledgeable on par with any premier institutes.

Step 5: Location Advantage:

KITS is surrounded by several villages and the ambience is set in a completely rural background with serene atmosphere. Many students are coming from nearby villages. Due to these factors the institute is free from pollution and doesn't get exposed to contamination. With these aspects' students will get benefited not only financially but also health point of view. By possessing the above special features, the institution maintains its distinctiveness.

The institute caters the needs and demands of students with regards to the transportation for both faculty and students with bus services covering extremely rural areas and the length and breathe of Markapur revenue division. The buses are safe with well-trained drivers appointed by the college authorities. The buses also equipped with First Aid facility.

Step 6: Development of Social Consciousness & NSS Activities:

- The institute is contributing to the development of the nation by capacity and character building of the students. The institute takes lead in serving the society and in inculcating those values in the minds of young generations and imbibing in them, the required qualities to make an honorable living in the society.
- The KITS-NSS team takes up initiatives in collaboration with government agencies and NGOs to build up social responsibility among the students by arranging blood donation camps, tree plantation, women empowerment, skill developments, voter's awareness programs, CleanCampus, Eco friendly activities etc.

- The students are given assignments and projects to identify the social problems in three – four layers
 - ✓ Understanding of their family situation and appreciating the work of their parents
 - ✓ Understanding problems in neighborhood.
 - ✓ Understanding the regional and national problems and the trends in technology and social perceptions
 - ✓ Attending real social problems through extension activities especially on Education, Health, Technical Skills, and other facilities like sanitation, cleanliness etc.

Step 7: Scholarships for Poor Students and Concessions on Hostel & Transportation Fees:

At our college, we firmly believe that financial barriers should not hinder access to quality education. We offer scholarships to deserving students from economically disadvantaged backgrounds, ensuring they have the opportunity to pursue their academic aspirations. Additionally, our college provides concessions on hostel fees, allowing students facing financial hardships to have a safe and comfortable living environment, enabling them to focus on their studies and personal growth. Fee concession on Transportation Charges enables individuals to travel conveniently to and from the college without any financial burden.

Step 8: Free Lunch & Transportation Provision for Staff & Annadanam Program:

For the past decade, our college has been providing free lunch & free transportation to all staff members. This practice not only fosters a sense of community among the staff but also acknowledges their hard work and dedication. By ensuring that all staff members receive nutritious meals, the college promotes a healthy and productive work environment.

Our college management consistently organizes the Annadanam program on different occasions such as Vinayaka Chaturthi and the Annual Day, providing free meals to those in need and promoting philanthropy in our community. This initiative symbolizes compassion and unity, bringing together students, faculty, staff, and the local community to alleviate hunger. Through active participation, our college cultivates social responsibility and empathy, instilling values that go beyond academics. This philanthropic effort not only addresses immediate needs but also nurtures a culture of generosity, making our college a beacon of hope in the community. The management's dedication to creating an inclusive society is evident through the Annadanam program.

Step 9: Health Consciousness Campaigns & Addressing Environmental Concerns:

- Our college actively raises awareness about health consciousness in nearby villages. Through workshops, seminars, and health camps, the college educates villagers about hygiene, preventive healthcare, and disease management. By bridging the gap between the college and the community, these campaigns promote overall well-being and contribute to a healthier society.
- Our college is dedicated to addressing environmental challenges such as water scarcity and pollution. Through various initiatives, including rainwater harvesting, waste management, and tree plantation drives, our college strives to create a sustainable and eco-friendly campus. Furthermore, students and faculty actively participate in campaigns to reduce air pollution and promote environmental conservation.

Step 10: Success of the Effort:

- Maximum Number of the students are getting placement in the campus itself and some of them are recruited for higher level jobs also. The conduct of events on the campus and entrepreneurship activities also helped them to attain good levels in their professions later.
- It is noteworthy to mention that some of the students, who are very low level in their communication and confidence at the time of admissions, became very successful anchor, orators, leaders etc., in their life, due to the training in the institute.
- With all above efforts the institution is happy that it is able to create access to quality education to the rural students of economically backward communities. Incidentally, this is the main concern of the Government of India, and one of the core values of NAAC, and the prime value of the statutory bodies like UGC, AICTE.

KITS justifiably takes pride that it has awarded Engineering and Management degrees to the students, thus leading to the improvement of quality of life of that many families in this region.

❖ **CLEAN INDIA CAMPAIGN 2.0:**

KITS Organized an Awareness program on “CLEAN INDIA CAMPAIGN 2.0” under the supervision of NSS Co-Ordinator Mr.P.V.Anilkumar, HOD of Mechanical Department on 29-10-2022. The campaign was carried out in one of the adopted village of Devarajugattu and with in the Campus of KITS and Peddaaravidu village. Banners bearing this slogan were displayed at various places in the locality. The Students of KITS divided themselves into groups of four. Each group visited the people in their homes. People were told how the use of polythene bags pollutes the environment. They were also educated that polythene was not biodegradable and that these bags could choke the sewers. They could also spoil the fertility of the soil. Shopkeepers in the locality were requested to give up the use of polythene carry-bags.

- ❖ Conducted awareness programs on "Swachh Bharat Mission" theme & rally, no plastics, cashless transactions etc.

KITS Organized an Awareness program on “SWACHH BHARAT MISSION” under the supervision of NSS Co-Ordinator Mr.P.V.Anilkumar, HOD of Mechanical Department on 29-10-2022. The campaign was carried out in one of the adopted village of Devarajugattu and with in the Campus of KITS and Peddaaravidu village. Banners bearing this slogan were displayed at various places in the locality. The Students of KITS divided themselves into groups of four. Each group visited the people in their homes. People were told how the use of polythene bags pollutes the environment. They were also educated that polythene was not biodegradable and that these bags could choke the sewers. They could also spoil the fertility of the soil. Shopkeepers in the locality were requested to give up the use of polythene carry-bags.

Plastic Collected within the campus and Devarajugattu Police Station by NSS Team

- ❖ Our Kits College Students Participated Rally On "Cashless Transaction" Programme Conducted By Police Department.

❖ COMMUNITY SERVICE PROJECTS:

Our college strongly believes in giving back to the community. To fulfill this commitment, various community service projects are undertaken throughout the year. These projects aim to address social issues, such as literacy, environmental awareness, healthcare, and rural development. By engaging students in these projects, our college instills a sense of empathy, social responsibility, and leadership skills in the next generation.

❖ ANNADANAM PROGRAM:

Our college management consistently organizes the Annadanam program on different occasions such as Vinayaka Chaturthi and the Annual Day, providing free meals to those in need and promoting philanthropy in our community. This philanthropic effort not only addresses immediate needs but also nurtures a culture of generosity, making our college a beacon of hope in the community. The management's dedication to creating an inclusive society is evident through the Annadanam program.
